SUMMARY

Frontend Developer specializing in React.js, Tailwind CSS, and modern JavaScript. Skilled at building responsive, high-performance user interfaces with reusable components. Strong eye for design implementation and seamless API integrations. Committed to writing clean code and collaborative development in office environments (Latur).

SKILLS

Javascript (ES6+)	Tailwind CSS
Python (Intermediate)	HTML5 & CSS3
React.js	Git & GitHub
Firebase,Vite	Framer Motion

Projects

Personal Portfolio Website | In Progress | [Git Repo](#)

Designed and developed a modern multi-page portfolio using React, Tailwind CSS, and Framer Motion. Integrated GitHub API, Web Speech API, and Spotify to showcase projects, skills, and interactive features with dark/light themes.

NetflixGPT | June 2025 | [Git Repo](#)

A streaming platform that uses TMDB API to deliver personalized recommendations and search functionality, reducing decision fatigue. Built with React, Redux, Firebase (Auth), and a Netflix-like UI for a seamless experience.

Food Ordering App | May 2025 | [Git Repo](#)

Built a responsive food ordering web app using React, Tailwind CSS, and Redux. Integrated Swiggy's API to dynamically fetch and filter restaurant and menu data for a seamless user experience.

EDUCATION

Bsc. Computer Science | COCSIT, Latur

July 2023 to May 2026.
